

IED / GPS / & RADIO JAMMERS

JUNE 2007

Set of Bomb Jammers «Model - 4MT»

Set of Bomb Jammers “4MT” is intended to ensure personnel safety during search and discharge of explosive devices having radio controlled fuses.

The Bomb Jammer “4MT” ensures the reliable prevention of radio fuse’s operation (blocking) while it is remotely controlled by a coded radio signal. The device offered can be used simultaneously with all existing explosive detecting equipment in no way interfering in its operation. The Bomb Jammer “4MT” blocks the operation of radio controlled explosive devices in 20...500 MHz frequency band.

Set of Bomb Jammers “4MT” consists of 2 devices “2MT” and “2MT Plus” that can be used separately or as a combined system.

Technical specifications:

radius of radio controlled fuses blocking (at control distance not less than 100 m), not less than, m	30
continuous operation time when powered from built-in rechargeable battery, no less than, hours	2
continuous operation time when powered from on-board vehicle power line (DC 12 V), hours, not less than	12
set mass, kg, not more than	16
